Single Senior Session

Senior sessions are so much fun! I absolutely love how each session is different, and I love to customize so that you get exactly what you want or need. Senior Portraits are a great way to capture this very special time in your life that will last forever. I've tried to put together a special package so that you get everything you want and need.

Four Seasons Senior Session

I know there are some of you, like myself, that might want more than what a single session can offer as far as different types of portraits. I know when my youngest was a Senior, I could hardly believe it and I wanted to hang on to each and every moment as long as I could. That's when I came up with the idea of photographing her during each season. This way I was able to get some amazing warm images with the fall colors, the stark images of the winter, and beautiful spring/summer images with all of nature's colors. Spring and Summer images can look very similar, so if you'd like to exchange one for a different, more personalized session, possibly sports, sunflowers, etc, I'd be happy to do that too. Since you will be receiving many photos throughout the year, these sessions will include 20-30 images of each season and will last around 1-2 hours.
